1950-51 WHOLESALE PRICE LIST

## CAMELLIAS

The following is our complete Wholesale Price List of Camellias for the 1950-1951 Season. We reserve the right to limit varieties of which we are short, in proportion to the number of more plentiful varieties ordered.

Our Camellia rooted cuttings are planted in the early Spring, direct to 4-inch pots to avoid the roots becoming pot-bound, which is very often the case in the smaller pots. The following Spring we shift these 4" plants to gallons assuring a strong and healthy root system. Many larger sizes are 2-year gallons.

Terms of Sale: Cash must accompany orders unless an established account with us. Packing at cost, on gallons and larger. All prices subject to change without further notice.

We have strived to select varieties of Camellias best suited for cut flower and corsage use, and at the same time not overlooking the need of a wide selection of showy garden varieties. We are always on the lookout for good new varieties.

Classifications used in the above list taken from those adopted by the Camellia Societies of California as follows:

Single - One row of not over eight petals. Example: Amabilis.

Semi-Double - Two or more rows of petals, conspicuous stamens. Example: Finlandia.

Anemone Form - A flat flower with one or more rows of large outer petals, the center a convex mass, composed of petaloids and stamens intermingled.

Example: Chandleri Elegans.

Peony Form - A deep rounded flower with several rows of outer petals, the center a convex mass of twisted petaloids and stamens. Example: Debutante.

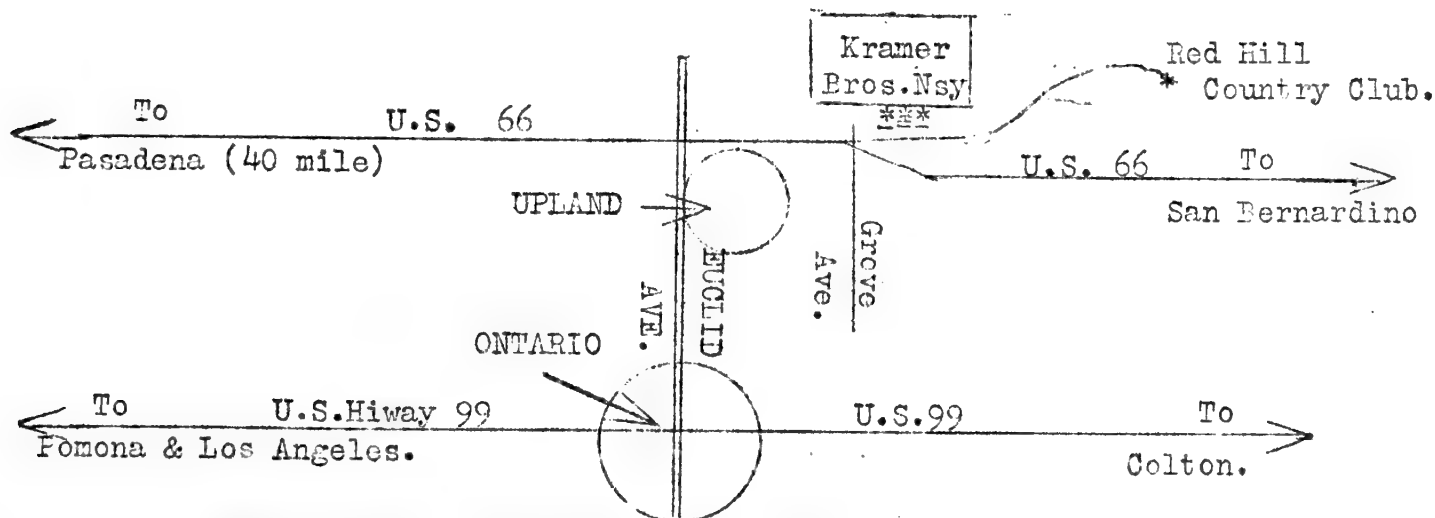

Rose Form - Imbricated petals, showing stamens in a concave center when fully open. Example: Purity.

Formal Double - Fully imbricated, many rows of petals never showing stamens. Example: Alba Plena.

Southern States - In compliance with the quarantine regulations of some of the Southern States on Camellias imported from California. Our camellias are carefully washed of all soil and the "bare-roots" are packed in damp sphagnum moss and wrapped in oil paper. The plants are then packed in sealed corrugated cartons. This method of packing assures a moist root-system upon arrival.

We can ship via railway express, or via air-freight from our air-port in Ontario.

PINTO TAG - We are an Authorized Pinto Tag Nursery. Having complied with the rigid plant pest inspection requirements of the California Department of Agriculture, we are permitted to ship to other counties without destination inspection.
